CO2 Emissions: 119 g/km

<sup>[1]</sup> The published fuel consumption and CO2 emission figures are established according to legislated technical specifications (UNECE Regulation 101/UN Regulation 83 and SANS 20101 standards), which sets out the procedures that are used to measure the CO2 emissions and fuel consumption. The claimed figures are established using specific tests under standardised, carefully controlled conditions and may differ from consumption achieved under real world conditions with the influences of altitude, road surface, geographic conditions, vehicle options, temperature, humidity, tyres size and driving behaviour amongst others. The petrol consumption given in l/100km and the CO2 emission given in g/km represent average values. Values within brackets are valid for the selected automatic transmission.

<sup>[2]</sup> Prices represent the manufacturers suggested, non-binding factory retail price including 14% VAT and including CO# emissions tax excluding registration, license plates and transfer fees. Actual price information is available from your BMW Dealer. The petrol consumption given in l/100km and the CO# emission given in g/km represent average values and apply in connection with the wheel and tyre size selected. Values within brackets are valid for the selected automatic transmission.
